

# TIP-MAG 2021

Vol.2 No.1

## Timber Industry Presents Magazine

### Miracle chip?

*A new DNA marker resource for genome-assisted breeding of pine trees.*

### A new perspective on pesticides

*The revised FSC Pesticide Policy means new rules for foresters to follow, but will it change the way they think?*

### The enemy of my enemy is my friend!

*Using natural enemies of insect pests for their management is an old and generally well-known approach. But is this approach still valuable within the current and future plantation forestry landscape?*
